

THE CLARITY SOLUTION FOR: MOBILE

Benefits

Cards can be viewed, emailed or faxed

Cards can be rotated, magnified or flipped for readability and usability

Both front and back sides displayed

Helps enhance member relationships

How can members access ID cards on the go?

The Clarity Smartphone application gives health plan members mobile access to their health insurance card anytime and anywhere, so even if the card itself is lost or forgotten, the member can receive services. It's the ultimate member experience.

How it Works

- **Organize.** The Clarity Solution allows for a PIN, in combination with other member data, to uniquely identify the member for secure access to the card. The client can set the number of PIN characters.
- **Customize.** The app can be branded for a client (including branding icons, artwork and colors) and configured to client specifications through common interfaces or client preference files.
- **Deliver.** Mobile delivery gives clients the opportunity to personally connect members anytime and anywhere.
